Selected Projects

Marrella Flex

Marrella flex is a Content Manage System that enables users to build and manage a business application on the internet. This application simplifies the process of content, entry screens, and reports creation, allowing users to maintain a web application without needing extensive technical knowlegde.

PHP, MySQL, HTML, CSS, JavaScript

ERP Application

A complete business application that organizations use to manage and streamline various aspects of business operations. This integrates different functions and processes across an organization into a single unified system, providing real-time visibility, data consistency, and efficiency across departments. It is composed of Accounting, Human Resource, Sales, Inventory and Manufacturing-data-flow modules.

PHP, MySQL, HTML, CSS, JavaScript, Git

Task Organizer

A personal web-based task management application that is used to track project tasks, time rendered, activities and credentials efficiently. The application is tailored to the needs of a full-stack developer.

PHP, MySQL, HTML, Vue.js, SCSS, Grunt, Node.js
